FOR IMMEDIATE RELEASE

February 8, 2016

Everseat Partners with Allscripts to Make Real-Time Smartphone Scheduling Readily Available

Baltimore, MD – Everseat has joined the award-winning Allscripts Developer Program (ADP) to make [Everseat digital self-scheduling](#) readily available to physicians. The integration will enable Allscripts users to post open appointments to the Everseat platform so patients can find and select appointments via Everseat’s free mobile app.

The partnership gives Everseat substantial added power to help Allscripts meet the daily needs of healthcare organizations, physicians and their patients. The robust set of developer tools available on the [Allscripts Developer Portal](#) and the technical support Allscripts provides for all developers integrating with its Open API demonstrate how committed Allscripts is to working with innovative technology companies for the benefit of patients.

Everseat Highlights:

- Patients can schedule their own appointments anytime from a secure, HIPAA-compliant and free mobile app on their smartphones.
- Providers keep their schedules full and deliver convenience and access to patients.

With the integration into Allscripts platform, open appointments will automatically feed into the Everseat platform, enabling interested patients to search for and book appointments via their mobile phones.

“Joining the Allscripts Developer Program will mean more convenience for patients and greater efficiency for physician practices using Allscripts. Everyone knows that convenience matters to healthcare consumers more than ever, and translates into greater satisfaction and potentially even better health outcomes” said Jeff Peres, CEO, Everseat. “Our goal is to create immediate value for healthcare providers and their patients.”

About Everseat

Everseat is a patient-centered scheduling platform that helps patients get access to appointments they need with their healthcare providers. The Baltimore-based technology company offers a web- and mobile-based platform that enables provider organizations to post open appointments to the platform so that patients can find slots that work for their schedules via the free Everseat mobile app. Appointments are posted and claimed in real-time, significantly increasing efficiency for the providers, and dramatically improving the patient experience. For more information, visit Everseat online at [everseat.com](#) or call 888-899-9506.
