### **Everseat Partners with 4PatientCare to Introduce Real-Time Smartphone Scheduling**

**Baltimore, MD** – Everseat, a technology company with a cutting-edge platform that allows patients to schedule doctor’s appointments directly from their smartphones, announced today it has partnered with 4PatientCare to make digital self-scheduling readily available to the network of healthcare practices that use 4PatientCare to communicate with their patients. The integration will allow 4PatientCare users to post open appointments to the Everseat platform so that patients can find and select appointments that work for them via Everseat’s free mobile app or web app.

As part of this partnership, 4PatientCare will enable its clients to join the Everseat platform using a seamless integration. 4PatientCare will also be the first software company to feature a dedicated “wait list” button in their dashboard so that practices can notify those patients on a wait list with the click of a button.

The companies completed the software integration work in late 2015 and will be providing client demos at the International Vision Expo East meeting in New York in April.

“This partnership enables Everseat to offer its services to all 4PatientCare clients and we expect this to drive enhanced levels of access, efficiency and patient satisfaction. Everyone knows that convenience matters to healthcare consumers more than ever,” said Jeff Peres, CEO of Everseat. “This relationship also enables the Everseat team to bring an enhanced scheduling toolkit to our existing clients. The team at 4PatientCare has emerged as a leader in patient engagement and we look forward to introducing this robust feature set to our clients.”

“We are very excited to partner with Everseat and provide yet another tool to streamline day-to-day operations for our clients. Everseat’s waitlist is the perfect addition to our current suite of services designed to optimize office efficiency,” stated Jeff Guterman, 4PatientCare CMO. “The more we can cut down on mundane office tasks, the more time becomes available for healthcare providers to focus on what’s truly important: the patient. The Everseat team has created wonderful tools and a network that will add tremendous value to our existing and future clients.”

#### **About 4Patient Care**

4PatientCare is a patient engagement solution designed to streamline the day-to-day operations of medical practices. With its real-time web scheduler at its heart, 4PatientCare allows practices to fill their schedules automatically, reduce their no-show rates, and build their online web presence; all while minimizing staff time, optimizing office efficiency, and increasing revenue. Appointments are booked and confirmed without any staff involvement required, and automated communications ensure that patients arrive at their appointment on time and prepared. For more information, visit 4PatientCare at [4patientcare.com](http://4patientcare.com) or call (562) 861-1800.

#### **About Everseat**

Everseat is a patient-centered scheduling platform that helps patients get access to appointments they need with their healthcare providers. The Baltimore-based technology company offers a web- and mobile-based platform that enables provider organizations to post open appointments to the platform so that patients can find slots that work for their schedules via the free Everseat mobile app or web app. Appointments are posted and claimed in real-time, significantly increasing efficiency for the providers, and dramatically improving the patient experience. For more information, visit Everseat online at [everseat.com](http://everseat.com) or call 888-899-9506.
